M.A. History and Culture of the Baltic Sea Region: History, political and cultural studies, literature and linguistics

“Challenges and solutions of a changing environment and society” is the University of Greifswald’s research mission that it approaches with three interfaculty and interacting research domains:

- **Baltic Sea Region**
- **One Health**
- **Prevention**

The foundation for these three research domains is provided by 12 well-established interdisciplinary key research topics.

Digitisation, research data management and artificial intelligence are incorporated to the same extent as internationalisation and a research-led teaching approach in the Research Strategy 2024.

ADVICE AND SUPPORT

- ✓ in matters related to application
- ✓ studies at the university or living in Greifswald
- ✓ social, academic, job or visa related issues
